Unexpected emissions of trichlorofluoromethane (CFC-11) (decision XXX/3)

Issues raised in the discussion:

1. Need to understand the past: what happened, how and why and its implications
2. Atmospheric monitoring and observation; actions proposed in the report of the Vienna symposium.
3. Role of General Trust Fund for financing activities on research and systematic observations
4. Role of the ORM and connection to SAP
5. Equal treatment of all parties in respect of Article 7 obligations
6. Strengthening monitoring, reporting and verification more generally
7. Measures adopted to be proportional to the financial resources available especially in A5 countries.
8. Illegal trade and reporting under decision XIV/7, iPIC, licensing systems and domestic compliance and enforcement
10. Role of the Montreal Protocol compliance mechanism
